The mythology of the American Revolution, too, is premised upon the idea of a zero point, an intellectual trope which received its most striking formulation in Thomas Paine’s oft-cited statement in Common Sense (published in 1776, the year of revolution): “We have it in our power to begin the world over again A situation, similar to the

### 1.12. Rolling, Torque, and Angular Momentum

The point on the top of the wheel has a speed (relative to the ground) that is twice the velocity of the center of mass. Consider the point in contact with the ground:  $v_{cm} = v_{cm} + v_{rel} = v_{cm} + (-v_{cm}) = 0$ . The point in contact with the ground has a speed of zero, i.e. momentarily at rest.

not there are any costs at time zero (i.e., at  $t=0$ ). Annualizing costs when there is no initial cost at  $t=0$  is estimated using the following equation:  $AC = PVC * r * (1 + r)^n - 1$  (3) where  $AC$  = annualized cost accrued at the end of each of  $n$  periods; 3 Variants of these formulas may be common in ...
